SUMMARY

Web platform engineer specializing in front-end frameworks, cloud architecture, DevOps automation, observability, and developer tooling. Experienced building scalable enterprise web infrastructure with React, TypeScript, Node.js, AWS, Terraform, Kubernetes, and Jenkins.

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co.

Associate Software Engineer III

Columbus, OH

July 2022 - Present

- Serve as cloud and DevOps lead for enterprise front-end framework applications, architecting AWS infrastructure, CI/CD workflows, and platform automation with Terraform and other IaC tooling
- Build and maintain web platform tooling, including CLI workflows that scaffold applications, standardize project setup, and improve developer experience across teams
- Design observability and telemetry solutions for framework applications, improving operational visibility across cloud-hosted services and developer workflows
- Help modernize legacy web applications by contributing to migration tooling, platform architecture, infrastructure design, and cloud cost awareness
- Engineer core npm libraries and CLI tooling for enterprise web framework architecture, standardizing application setup, improving developer velocity, and enabling consistent platform adoption across teams

Ohio University

Student Software Engineer

Athens, OH

September 2019 - April 2022

- Modernized and maintained internal web applications used by faculty, staff, and students
- Rewrote web applications using Node.js and implemented Playwright test automation, improving reliability and reducing manual QA effort
- Refactored legacy integrations into Python services deployed on Kubernetes, improving scalability and maintainability

JPMorgan Chase & Co.

Software Engineer Program Intern

Remote

Summer 2021

- Designed a MuleSoft and Kafka API integration layer for small business reward eligibility, connecting modern services with legacy banking systems

KeyBank

Key Technology, Operations and Services Intern

Remote

Summer 2020

- Built Kibana dashboards and Ansible automation for cloud-native monitoring and deployment workflows

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (Amazon Web Services, July 2023)
- AWS Certified Developer - Associate (Amazon Web Services, January 2025)
- AWS Certified CloudOps Engineer - Associate (Amazon Web Services, May 2026)
- CKAD: Certified Kubernetes Application Developer (The Linux Foundation, December 2023)
- HashiCorp Certified: Terraform Associate (HashiCorp, June 2026)
- FinOps Certified Practitioner (The Linux Foundation, September 2024)

SKILLS

Languages: TypeScript, JavaScript, Python, Swift, C++

Frontend & Platform: React, Node.js, Next.js, GraphQL, npm libraries, CLI tooling

Cloud & DevOps: AWS, ECS, Lambda, RDS, ElastiCache, Terraform, Ansible, Docker, Kubernetes, IaC

Observability & Tooling: OpenTelemetry, Datadog, Jenkins, Git, GitHub, CI/CD

EDUCATION

Ohio University

Bachelor of Science in Computer Science, Minor: Applied Mathematics

Athens, OH

April 2022

GPA: 3.932/4.00
